

LIBRARY USAGE RECORD – DATA ANALYSIS REPORT

30-Day Daily Footfall Analysis | September 2026

1. Executive Summary

The 30-day record contains **2,862 visitors**, with an average daily footfall of **95.4**. The highest footfall was **145** visitors on **26-09-2026 (Saturday)**, while the lowest was **68** visitors on **14-09-2026 (Monday)**. The main pattern is substantially higher weekend usage, particularly on Saturdays.

2. Key Findings

Metric	Finding
Highest footfall	145 visitors – 26-09-2026 (Saturday)
Lowest footfall	68 visitors – 14-09-2026 (Monday)
Total footfall	2,862 visitors
Average daily footfall	95.4 visitors
Peak usage day	Saturday
Lowest average day	Monday

3. Weekly Trends

Week	Total	Average / Day	Trend
Week 1	648	92.6	Moderate / stable
Week 2	671	95.9	Moderate / stable
Week 3	666	95.1	Moderate / stable
Week 4	691	98.7	Highest weekly average
Week 5	186	93.0	Partial week

Week 4 has the highest average footfall at 98.7 visitors per day. Week 5 contains only two days, so it should not be compared directly with the full weeks.

4. Peak Usage Days

Rank	Date	Day	Footfall
1	26-09-2026	Saturday	145
2	19-09-2026	Saturday	140
3	12-09-2026	Saturday	132
4	27-09-2026	Sunday	127
5	05-09-2026	Saturday	125

Saturday is the strongest recurring usage day, averaging about 135.5 visitors. Monday has the lowest average at about 70.8 visitors.

5. Unusual Changes and Patterns

- Footfall reaches the monthly low of 68 visitors on Monday, 14 September.

- Footfall rises from 77 on Friday, 25 September to 145 on Saturday, 26 September — an increase of 68 visitors (about 88%).
- Weekend attendance is consistently much higher than weekday attendance.
- The final Saturday/Sunday period records very high usage before footfall falls again on Monday.

6. Five Actionable Suggestions

1. Increase seating capacity and staffing during Saturday and Sunday peak periods.
2. Introduce reading programs, workshops, or student activities on Mondays to improve low weekday usage.
3. Promote weekday library resources and services through announcements, posters, and student groups.
4. Ensure popular books, computers, and study spaces are adequately available before weekends.
5. Continue collecting daily footfall and create a monthly Excel dashboard to monitor trends and support resource planning.

7. Conclusion

The library shows a clear weekly usage pattern: weekends, especially Saturdays, are the busiest periods, while Mondays have the lowest demand. Overall usage is relatively stable with a modest increase toward Week 4. These findings can support better staffing, seating, facilities, and activity planning.
